

IRF Exhibition

1 – 2 November 2012

Manekshaw Centre, Swarna Jayanti Marg, Delhi Cantt., New Delhi, India

Government of India is proposing to spend one trillion dollar in infrastructure during the 12th Five Year Plan, out of which about 200 billion dollar will be for road sector. This means a quantum shift in modernization of the road network of the country. This giant programme is going to utilize most modern technologies drawn from across the globe. In addition to roads, urban transport systems and airports are some of the most vibrant areas of infrastructure development targeted by the Government. The Exhibition proposed to be held as a concurrent event in the excellent venue of the Manekshaw Centre, will have an added advantage of the large audience from the congregation of experts of transport sector. The Exhibition will draw visitors from all walks of life, which will have interest in traffic and other technologies for infrastructure management. At the show, an array of government officials, state and cities investment leaders and a host of other key industry players will expose themselves to a variety of accepted technology products.

Under one roof, in the combination with the 7th IRF Regional Conference on 'Road Safety in Urban and Rural Roads' and the involvement of local, regional and national authorities, this will be an opportunity to showcase the technologies, products and processes to the actual users. This will be an outstanding business opportunity for all those who are going to participate in the Exhibition, and it is going to be a highly satisfying experience. IRF India Chapter is organizing the exhibition to display the state-of-the-art equipment for Traffic Management and Road Safety, Intelligent Transport System, Public Transport System, Parking Systems & Management, Tolling System, Infrastructure and Environment. The demand for these equipments has been created by the unprecedented and all-round developments in transport sector in India. The participants as well as the visitors will benefit mutually from one-to-one interaction among experts, users and suppliers.
